Switzerland Employment Outlook

The ManpowerGroup Employment Outlook Survey for the fourth quarter 2018 was conducted by interviewing a representative sample of 751 employers in Switzerland.

All survey participants were asked, “How do you anticipate total employment at your location to change in the three months to the end of December 2018 as compared to the current quarter?”

Switzerland Employment Outlook

Switzerland	Increase	Decrease	No Change	Don't Know	Net Employment Outlook	Seasonally Adjusted Outlook
	%	%	%	%	%	%
Oct-Dec 2018	5	8	87	0	-3	-2
Jan-Mar 2018	7	2	91	0	+5	+4
Apr-June 2018	9	5	85	1	+4	+2
Jan-Mar 2018	5	4	87	4	+1	+3
Oct-Dec 2017	4	5	89	2	-1	0

Swiss employers report muted hiring intentions for the final quarter of 2018. With 5% of employers expecting an increase in staffing levels, 8% forecasting a decrease and 87% anticipating no change, the Net Employment Outlook is -3%.

Once the data is adjusted to allow for seasonal variation, the Outlook stands at -2%, and is the weakest reported in five years. Hiring prospects decline by 6 percentage points when compared with the previous quarter, and are 2 percentage points weaker year-over-year.

Throughout this report, we use the term "Net Employment Outlook." This figure is derived by taking the percentage of employers anticipating total employment to increase and subtracting from this the percentage expecting to see a decrease in employment at their location in the next quarter. The result of this calculation is the Net Employment Outlook.

From this point forward, all data discussed in the commentary is seasonally adjusted, unless stated otherwise. In the graphs, the number in brackets is the Net Employment Outlook when adjusted to remove the impact of seasonal variations in hiring activity.

Organization-Size Comparisons

Organization-Size	Increase	Decrease	No Change	Don't Know	Net Employment Outlook	Seasonally Adjusted Outlook
	%	%	%	%	%	%
Micro businesses (less than 10 employees)	4	8	87	1	-4	-2
Small businesses (10-49 employees)	8	3	87	2	+5	+6
Medium businesses (50-249 employees)	10	8	81	1	+2	+5
Large businesses (250 or more employees)	13	7	78	2	+6	+6

Participating employers are categorized into one of four organization sizes:

Micro businesses have less than 10 employees; Small businesses have 10-49 employees; Medium businesses have 50-249 employees; and Large businesses have 250 or more employees.

Workforce gains are anticipated in three of the four organization size categories during the coming quarter. Small- and Large-size employers forecast modest payroll gains with Net Employment Outlooks of +6%, while the Outlook for Medium firms stands at +5%. However, Micro employers report uncertain hiring plans with an Outlook of -2%.

In comparison with the previous quarter, Medium employers report a decline of 6 percentage points, while Outlooks for Large- and Micro-size employers are 5 percentage points weaker. However, Small employers report an improvement of 4 percentage points.

When compared with this time one year ago, Small employers report an improvement of 5 percentage points, but Outlooks decline in both the Large- and Micro-size categories, decreasing by 7 and 3 percentage points, respectively. Meanwhile, Medium employers report relatively stable hiring prospects.

Regional Comparisons

Employers in three of the seven regions expect to grow payrolls during 4Q 2018. Nordwestschweiz employers report the strongest hiring plans with a positive Net Employment Outlook of +15%. Elsewhere, modest hiring activity is forecast with Outlooks of +8% and +4% in Zürich and Ostschweiz, respectively. However, payrolls are forecast to decline in three regions, including Ticino, where employers report a gloomy Outlook of -21%. Region Lémanique employers report sluggish hiring plans with an Outlook of -5%, while the Outlook for Zentralschweiz stands at -2%.

Outlooks decrease by 9 and 8 percentage points in Ostschweiz and Region Lémanique, respectively. Elsewhere, Nordwestschweiz employers report a moderate improvement of 7 percentage points.

When compared with this time one year ago, hiring plans also weaken in four of the seven regions, including Ticino, with a decrease of 17 percentage points. Ostschweiz employers report a decline of 9 percentage points, while the Zentralschweiz Outlook is 8 percentage points weaker. Meanwhile, Outlooks strengthen in three regions, including Nordwestschweiz with a considerable increase of 20 percentage points, and Espace Mittelland, where employers report an improvement of 4 percentage points.

Quarter-over-quarter, hiring intentions weaken in four of the seven regions. Ticino employers report a considerable decline of 18 percentage points, and

+1 (0)%

Espace Mittelland

Job seekers can expect a flat labor market in the October-December time frame, according to employers who report a Net Employment Outlook of 0%.

Hiring prospects remain relatively stable in comparison with 3Q 2018, and improve by 4 percentage points when compared with this time one year ago.

+17 (+15)%

Nordwestschweiz

The strongest labor market in seven years is forecast for the upcoming quarter.

Employers report a Net Employment Outlook of +15%, improving by 7 percentage points when compared with the previous quarter, and by 20 percentage points in comparison with 4Q 2017.

+1 (+4)%

Ostschweiz

Employers anticipate limited hiring activity in the next three months, reporting a Net Employment Outlook of +4%.

However, hiring intentions decline by a considerable margin of 9 percentage points both quarter-over-quarter and year-over-year.

-8 (-5)%

Region Lémanique

The weakest hiring pace in more than two years is expected in the final quarter of 2018.

Employers report a muted Net Employment Outlook of -5 %, declining by 8 percentage points when compared with the previous quarter, but remaining relatively stable in comparison with 4Q 2017.

-24 (-21)%

Ticino

Reporting a gloomy Net Employment Outlook of -21 % for the upcoming quarter, employers forecast the weakest labor market since the survey began more than 13 years ago.

Hiring plans decline considerably both quarter-over-quarter and year-over-year, decreasing by 18 and 17 percentage points, respectively.

-2 (-2)%

Zentralschweiz

Job seekers can expect subdued hiring activity in 4Q 2018, according to employers who report a Net Employment Outlook of -2%.

When compared with 3Q 2018, the Outlook declines by 2 percentage points, and employers report a decrease of 8 percentage points when compared with this time one year ago.

+5 (+8)%

Zürich

Employers report encouraging signs for job seekers in the October-December period with a Net Employment Outlook of +8%.

Hiring intentions remain relatively stable when compared with the previous quarter, and are 2 percentage points stronger in comparison with 4Q 2017.

Sector Comparisons

Employers in eight of the 10 industry sectors forecast a decline in staffing levels during 4Q 2018. Transport, Storage & Communication sector employers anticipate the weakest labor market, reporting a Net Employment Outlook of -7%. Sluggish Outlooks of -6% and -5% are reported in the Agriculture, Hunting, Forestry & Fishing sector and the Public & Social sector, respectively. Elsewhere, employers report disappointing Outlooks of -3% in four sectors, the Manufacturing sector, the Mining & Quarrying sector, the Restaurants & Hotels sector and the Wholesale & Retail Trade sector. However, modest payroll gains are expected in both the Construction sector and the Finance, Insurance, Real Estate & Business Services sector, with Outlooks standing at +6%.

In comparison with the previous quarter, Outlooks weaken in seven of the 10 industry sectors. Manufacturing sector employers report the most noteworthy decline of 13 percentage points, while the Outlook for the Public & Social sector is 7 percentage points

weaker. Hiring plans decrease by 6 percentage points in both the Construction sector and the Transport, Storage & Communication sector, while Agriculture, Hunting, Forestry & Fishing sector employers report a decline of 5 percentage points. Meanwhile, Outlooks improve in three sectors, including the Electricity, Gas & Water sector with an increase of 4 percentage points.

Employers report weaker hiring plans in six of the 10 industry sectors when compared with this time one year ago. The Outlook for the Wholesale & Retail Trade sector declines by a considerable margin of 10 percentage points, while decreases of 9 percentage points are reported for the Electricity, Gas & Water sector, the Public & Social sector and the Restaurants & Hotels sector. Elsewhere, hiring intentions strengthen in three sectors, most notably by 12 percentage points in the Manufacturing sector, and by 6 percentage points in the Construction sector.

-6 (-6)%

Agriculture, Hunting, Forestry & Fishing

Job seekers can expect a struggling labor market in the coming quarter, according to employers who report a Net Employment Outlook of -6%.

Hiring prospects decline by 5 percentage points when compared with the previous quarter, but are unchanged in comparison with 4Q 2017.

+5 (+6)%

Construction

Employers forecast modest payroll gains during 4Q 2018, reporting a Net Employment Outlook of +6%.

While the Outlook is 6 percentage points weaker quarter-over-quarter, employers report a year-over-year improvement of 6 percentage points.

+2 (-1)%

Electricity, Gas & Water Supply

A subdued hiring climate is expected in the October-December time frame, with employers reporting a Net Employment Outlook of -1 %.

Hiring intentions are 4 percentage points stronger in comparison with 3Q 2018, but decline by 9 percentage points when compared with this time one year ago.

+6 (+6)%

Finance, Insurance & Real Estate

With a Net Employment Outlook of +6 %, employers anticipate a slight increase in staffing levels during the next three months.

Hiring plans improve by 2 and 3 percentage points in comparison with 3Q 2018 and 4Q 2017, respectively.

-4 (-3)%

Manufacturing

Job seekers can expect a muted hiring pace in the fourth quarter of 2018, according to employers who report a Net Employment Outlook of -3%.

Hiring prospects decline by a considerable margin of 13 percentage points when compared with the previous quarter, but are 12 percentage points stronger in comparison with this time one year ago.

0 (-3)%

Mining & Quarrying

Employers expect the labor market slump to continue in 4Q 2018, reporting a sixth consecutive negative Net Employment Outlook, standing at -3%.

Hiring intentions remain relatively stable both quarter-over-quarter and year-over-year.

-6 (-5)%

Public & Social

The weakest hiring pace in two years is forecast for the coming quarter.

Employers report a Net Employment Outlook of -5%, declining by 7 percentage points when compared with the previous quarter, and by 9 percentage points in comparison with 4Q 2017.

-10 (-3)%

Restaurants & Hotels

The downbeat hiring climate is expected to continue in the next three months, with employers reporting a third consecutive negative Net Employment Outlook, standing at -3%.

While the Outlook remains relatively stable in comparison with 3Q 2018, employers report a considerable decline of 9 percentage points year-over-year.

-9 (-7)%

Transport, Storage & Communication

Job seekers can expect the weakest labor market in more than two years during the October-December period.

The Net Employment Outlook stands at -7 %, declining by 6 percentage points when compared with the previous quarter, and by 8 percentage points in comparison with this time one year ago.

-2 (-3)%

Wholesale & Retail Trade

Employers anticipate sagging hiring activity in the forthcoming quarter, reporting a Net Employment Outlook of -3 %.

Hiring prospects are 3 percentage points weaker in comparison with 3Q 2018, and decline by 10 percentage points when compared with the final quarter of 2017.

* Indicates unadjusted data.

1. Number in parentheses is the Net Employment Outlook when adjusted to remove the impact of seasonal variations in hiring activity. Please note that this data is not available for all countries as a minimum of 17 quarters worth of data is required.

Global Employment Outlook

ManpowerGroup interviewed 59,351 employers across 44 countries and territories to forecast labor market activity* in Quarter 4 2018. All participants were asked, “How do you anticipate total employment at your location to change in the three months to the end of December 2018 as compared to the current quarter?”

ManpowerGroup’s fourth-quarter research reveals that some job gains are expected in 43 of 44 countries and territories during the October-December time frame. However, there is little evidence of notable surges in hiring activity. Overall employer confidence is little changed from prior quarters and most employers remain resilient, appearing content to engage in modest levels of hiring activity against a backdrop of challenges associated with a realignment of global trading partners and ongoing tariff negotiations.

Fourth-quarter hiring plans strengthen in 22 of 44 countries and territories when compared to the July-September time frame, weaken in 14 and are unchanged in eight. When compared to last year at this time, Outlooks improve in 23 countries and territories, weaken in 13 and are unchanged in seven.** Fourth-quarter hiring confidence is strongest in Japan, Taiwan, the U.S., Romania and Slovenia, while the weakest hiring prospects are reported in Switzerland, Argentina, France and Italy.

Across the Europe, Middle East & Africa (EMEA) region, workforce gains are expected in 25 of 26 countries. Hiring plans improve in 11 countries quarter-over-quarter but weaken in nine. In a year-over-year comparison, job gains are expected to improve in 13 countries and decline in seven. Employers in

Romania and Slovenia report the most optimistic hiring intentions. Conversely, Swiss employers report the weakest hiring plans, as well as the only negative forecast among the 44 participating countries and territories.

Employers in each of 10 participating countries in the Americas region also expect varying levels of workforce gains. Outlooks improve in eight countries and decline in only two in a quarter-over-quarter comparison. Year-over-year, hiring prospects are stronger in six countries and decline in three. Employers in the United States, Canada and Mexico report the region’s most optimistic fourth-quarter hiring plans, while employers in Argentina and Panama expect the weakest job growth.

Staffing levels are expected to grow in all eight Asia Pacific countries and territories during the October-December time frame. When compared to the prior quarter, Outlooks improve in three countries and territories and decline in three others. In comparison with last year at this time, employers report stronger hiring prospects in four countries and territories, but weaker forecasts in three. Japanese employers report the region’s strongest hiring plans and expect the strongest fourth-quarter global hiring pace. Employers in China expect some job gains in the next three months, but report the region’s weakest hiring plans.

* Commentary is based on seasonally adjusted data where available. Data is not seasonally adjusted for Croatia or Portugal.

** Only 43 countries and territories eligible for year-over-year comparison; Croatia has no year-over-year data at this point.

Full survey results for each of the 44 countries and territories included in this quarter’s survey, plus regional and global comparisons, can be found at www.manpowergroup.com/meos. The next ManpowerGroup Employment Outlook Survey will be released on 11 December 2018 and will detail expected labor market activity for the first quarter of 2019.

International Comparisons – EMEA

ManpowerGroup interviewed 21,218 employers in 26 countries in the Europe, Middle East and Africa (EMEA) region. Outlooks are mostly positive with employers in all countries except Switzerland planning to add to their payrolls in the fourth quarter. The region’s strongest forecasts are reported in Romania and Slovenia, while the weakest forecasts are reported by Swiss, French and Italian employers.

Modest job gains are expected across Europe’s four largest economies. Employers in Germany forecast the group’s most favorable hiring climate and report the country’s strongest Outlook in seven years. Job prospects are more subdued in the UK, but hiring plans remain relatively stable with the cautiously optimistic forecasts reported three months ago and last year at this time. Meanwhile, employers report more conservative hiring plans in both France and Italy. Some job gains are expected in most of France’s industry sectors and regions, but France’s Outlook dips slightly in both quarter-over-quarter and year-over-year comparisons. Italy’s Outlook rebounds slightly from the prior quarter’s negative forecast and is boosted, in part, by the strongest Manufacturing sector Outlook reported since the country launched the survey in 2003.

Elsewhere in Western Europe job prospects are mixed. Belgian employers forecast some gains in all but one industry sector, with the most hiring activity expected in the Construction and Finance & Business Services sectors. Similarly, Dutch employers forecast varying degrees of payroll growth in all industry sectors and regions with steady job gains expected in the Utilities and Finance & Business Services sectors. Some

opportunities for job seekers are expected across each of Spain’s industry sectors and across most regions. Austria’s Outlook is also cautiously optimistic, with employers in the Manufacturing sector reporting for the second consecutive quarter the strongest job prospects since 2008. Employers appear more uncertain in Switzerland where negative forecasts are reported in all but two industry sectors.

Employer confidence is more upbeat in much of Eastern Europe. Outlooks are positive across all Slovenian industry sectors and regions, including the Construction and Finance & Business Services sectors where forecasts improve considerably in both quarter-over-quarter and year-over-year comparisons. Romanian employers also predict an active hiring pace in the Construction sector as well as in the Manufacturing sector where more than a third of employers said they planned to add staff in the last three months of the year. Similarly, Hungarian employers report the strongest Manufacturing sector forecast in the EMEA this quarter, with solid job gains also expected in the Construction and Transport, Storage & Communications sectors.

Across the Nordic nations, employers in Finland anticipate the most fourth-quarter job gains with optimistic forecasts reported in both the Finance & Business Services and Manufacturing sectors. Sweden’s cautiously optimistic Outlook is buoyed by favorable hiring plans in the Manufacturing and Wholesale & Retail Trade sectors. Meanwhile, Norway’s forecast declines slightly from three months ago, but varying levels of job gains are expected across most sectors and all but one region.

International Comparisons – Americas

The Quarter 4 2018 survey is based on interviews with 23,246 employers from 10 countries across North, Central and South America. Payrolls are expected to grow by varying margins in each of the countries during the October-December time frame. However, hiring expectations are notably different across the region.

Employers in the United States report the most optimistic fourth-quarter hiring plans, with the forecast remaining relatively stable from three months ago and improving slightly from last year at this time. As in every quarter for the past five years, Leisure & Hospitality sector employers expect the most active hiring pace, with similarly strong job growth expected in the Professional & Business Services and Transportation & Utilities sectors.

Meanwhile, Canada’s Outlook remains among the strongest reported in the last seven years with employers expecting varying levels of job growth in all 10 industry sectors and all four regions through the last three months of the year.

Mexico’s employers appear similarly upbeat, fueled in part by a favorable fourth-quarter forecast in the Mining & Extraction sector where the Outlook has improved steadily for the fourth consecutive quarter.

Across Central America, Outlooks are mixed. Employers in Guatemala anticipate a steady fourth-quarter hiring pace with positive forecasts reported across all industry sectors—especially in the Construction sector where more than one of every five employers surveyed plan to add to their payrolls by the end of the year.

Hiring plans remain positive across all of Costa Rica’s industry sectors. However, the country’s Outlook has declined considerably from year-ago levels with employer confidence also softening in all sectors quarter-over-quarter, including the Commerce sector where hiring intentions grow even more conservative following the fourth consecutive quarter of decline.

Job growth is expected to lag in Panama despite upbeat forecasts in both the Construction and Services sectors. However, employer confidence in the Manufacturing sector continues to trend weaker and the Outlook turns negative for the second time in less than two years.

Further south, opportunities for job seekers in Colombia are expected to grow more favorable, boosted by optimistic forecasts in the Construction sector as well as the Manufacturing sector where hiring plans are the strongest reported in seven years. Peru’s forecast remains cautiously optimistic with the strongest job growth expected in the Finance, Insurance & Real Estate sector, as well as the Manufacturing sector where the Outlook strengthens considerably in comparison to the prior quarter and last year at this time.

Employer confidence in Brazil continues to remain modest, but positive. The strongest job gains are expected in the Manufacturing sector and the Services sector where employers report their most optimistic forecast in nearly four years. The least optimistic hiring plans in the Americas are reported in Argentina where the overall Outlook is dragged down by the Construction sector where the forecast declines to its weakest level since the survey started in 2007.

International Comparisons – Asia Pacific

14,887 employers were interviewed in the Asia Pacific region. Employers in each of the eight countries and territories expect varying degrees of payroll growth through the end of the year.

The region’s strongest hiring plans are reported in Japan, with one of every four surveyed employers expressing a desire to expand payrolls through the end of the year. However, employer hiring intentions appear to be constrained by a lack of available talent as indicated by ManpowerGroup’s recently released Talent Shortage Survey and the government’s recent efforts to accommodate more foreign workers to counterbalance the declining population of working-age Japanese. Employers in Japan’s Mining & Construction, Services and Transportation & Utilities sectors report the fourth quarter’s most aggressive hiring intentions.

A strong labor market is expected in Taiwan through the end of year despite the uncertainty associated with lingering trade friction between the United States and China. Forecasts indicate that opportunities for job seekers will remain solid in most industry sectors, and more than a quarter of the country’s employers indicate they intend to add to their workforces during the last three months of the year.

India’s fourth-quarter Net Employment Outlook is the weakest reported since the survey was launched in 2005. However, the forecast points only to a slowdown in the hiring pace instead of an overall reduction in payrolls, and staffing levels in each of India’s industry sectors and regions are expected to grow by varying degrees in the next three months.

Similarly, Outlooks are positive across each of China’s industry sectors and regions, but the forecast is the weakest reported in the region and declines slightly in comparison to both three months ago and last year at this time.

Hong Kong’s hiring climate continues to be favorable and job growth has remained relatively steady for eight consecutive quarters, buoyed by consistently strong forecasts in both the Services and Finance, Insurance & Real Estate sectors.

Singapore’s Outlook has marginally improved for three consecutive quarters and is the strongest forecast reported in over three years. The brightest fourth-quarter job prospects are in the Public Administration/ Education sector where more than four of every ten employers said they planned to hire over the next three months.

Australia’s fourth-quarter forecast remains upbeat. The Outlook improves slightly in both quarter-over-quarter and year-over-year comparisons, fueled in large part by the strongest hiring plans reported in the Finance, Insurance & Real Estate and Transportation & Utilities sectors in more than six years.

Job seekers in New Zealand are also likely to benefit from a steady hiring pace in the October-December time frame. Outlooks are positive across all industry sectors and regions with employers in the Transportation & Utilities and Manufacturing sectors reporting their strongest hiring intentions in nearly four years.

About the ManpowerGroup Employment Outlook Survey

The ManpowerGroup Employment Outlook Survey is conducted quarterly to measure employers' intentions to increase or decrease the number of employees in their workforces during the next quarter. ManpowerGroup's comprehensive forecast of employer hiring plans has been running for more than 55 years and is one of the most trusted surveys of employment activity in the world. Various factors underpin the success of the ManpowerGroup Employment Outlook Survey:

Unique: It is unparalleled in its size, scope, longevity and area of focus.

Projective: The ManpowerGroup Employment Outlook Survey is the most extensive, forward-looking employment survey in the world, asking employers to forecast employment over the next quarter. In contrast, other surveys and studies focus on retrospective data to report on what occurred in the past.

Independent: The survey is conducted with a representative sample of employers from throughout the countries and territories in which it is conducted. The survey participants are not derived from ManpowerGroup's customer base.

Robust: The survey is based on interviews with over 59,000 public and private employers across 44 countries and territories to measure anticipated employment trends each quarter. This sample allows for analysis to be performed across specific sectors and regions to provide more detailed information.

Focused: For more than five decades the survey has derived all of its information from a single question:

For the 4Q 2018 research, all employers participating in the survey worldwide are asked the same question, "How do you anticipate total employment at your location to change in the three months to the end of December 2018 as compared to the current quarter?"

Methodology

The ManpowerGroup Employment Outlook Survey is conducted using a validated methodology, in accordance with the highest standards in market research. The survey has been structured to be representative of each national economy. The margin of error for all national, regional and global data is not greater than +/- 3.9%.

Net Employment Outlook

Throughout this report, we use the term "Net Employment Outlook." This figure is derived by taking the percentage of employers anticipating an increase in hiring activity and subtracting from this the percentage of employers expecting to see a decrease in employment at their location in the next quarter. The result of this calculation is the Net Employment Outlook. Net Employment Outlooks for countries and territories that have accumulated at least 17 quarters of data are reported in a seasonally adjusted format unless otherwise stated.

Seasonal adjustments have been applied to the data for all participating countries except Croatia and Portugal. ManpowerGroup intends to add seasonal adjustments to the Portuguese data in the future, as more historical data is compiled. Note that in Quarter 2 2008, ManpowerGroup adopted the TRAMO-SEATS method of seasonal adjustment for data.

About ManpowerGroup®

ManpowerGroup (NYSE: MAN), the leading global workforce solutions company, helps organizations transform in a fast-changing world of work by sourcing, assessing, developing and managing the talent that enables them to win. We develop innovative solutions for hundreds of thousands of organizations every year, providing them with skilled talent while finding meaningful, sustainable employment for millions of people across a wide range of industries and skills. Our expert family of brands – Manpower®, Experis®, Right Management® and ManpowerGroup® Solutions – creates substantially more value for candidates and clients across 80 countries and territories and has done so for 70 years. In 2018, ManpowerGroup was named one of the World’s Most Ethical Companies for the ninth year and one of Fortune’s Most Admired Companies for the sixteenth year, confirming our position as the most trusted and admired brand in the industry. See how ManpowerGroup is powering the future of work: www.manpowergroup.com.

Manpower Switzerland

Founded in Geneva in 1960 as a franchise of the ManpowerGroup, Manpower Switzerland matches up the most talented workers on the market – from employees to project managers right through to managing directors – with companies looking for specific skill-sets. Leading the way in efficient and innovative HR solutions, Manpower is the trusted partner of over 5000 clients each year – small, medium and large enterprises – and over 20,000 associates. The company’s key focus is on connecting employers and candidates, and to this end Manpower Switzerland increasingly uses tailor-made solutions to respond to the complex needs of companies in an ever-changing world of work. With more than 300 internal staff, Manpower is present in 40 towns in Switzerland and is firmly established in every linguistic region.
